Precipitation probability							
70%	70%	20%	20%	60%	80%	60%	60%

Forecast for Tuesday 25 May 2021

Weather: Cloudy with a few outbreaks of rain overnight will lead to a cloudy start to Tuesday. Some brighter or sunny spells will soon develop in the morning however this will soon be compromised by the development of frequent showers over the fells. During the afternoon the showers will get heavier with the risk of a rumble of thunder and some hail for a time. Showers will tend to die out in the evening with some brighter conditions developing.

Chance of cloud free mountain/hill tops above 800m: 60% chance, cloud shrouding the fell tops at times especially as showers group together or heavier showers move through the area.

Visibility: Cloud bases will generally be above the summits but will lower in heavier showers or when showers group to give longer spells of rain, the bases will be around 600m temporarily. General visibility is likely to fall poor in heavier showers especially during the afternoon when there could be hail in the showers. Outwith showers visibility will be very good with good views likely and any showers should be easy to spot approaching.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling cool again in northwesterly winds especially in heavier showers with hail, a bit of a wintry feel at times with freezing level not far off the highest summits.

Forecast for Wednesday 26 May 2021

Weather: Mainly dry and cloudy overnight and through the morning. Some sunny spells developing and then a few showers in the afternoon. These will die out in the evening leaving a clear night.

Maximum wind: Northwesterly 10 -15 mph.

Chance of cloud free mountain/hill tops above 800m: 80%, tops generally clear but perhaps a few patches of cloud early in the morning and in any heavier showers.

Visibility: Generally very good visibility in the northwesterly airstream but visibility dipping in any heavier showers and if cloud gathers over fell tops for a time.

Temperature: **Valleys:** Plus 5 rising to 13 Celsius.
At 800m: Plus 3 rising to 9 Celsius.
Freezing level: above the summits.
